

# HERDER®

## Rapier MBK 180

The **Rapier MBK 180** combines the already proven HERDER® quality with the high hydraulic capacity, high-quality engineering and the flexibility, which we already know. With this mowing arm you will be ensured of remarkable performances at point of delivery.

There is a choice of reaches of 130 or 150 cm with different types of flails for grass and hedge maintenance.

The multifunctional hydraulics makes it possible to work with a top mower or hedge cutter without any adaptations. The longest reach can be on the left or right hand side, as desired.
